* Price correct as of 1/11/2019. New Build Co reserve the right to alter any price without notice. All drawings and plans are subject to developers and/or council approval and may vary depending on the outcome of their decision. The price is based on developer supplied engineering plans and plans of subdivision and final price may vary if actual site conditions differ to those shown in developer supplied documents. If amendments are required to the drawings/plans, the price can vary accordingly. The Purchaser acknowledges that this advertised price may vary due to the factors listed above which will be outside of the builders control. Please contact your sales specialist for site cost exclusions. All photos and images are for illustrative purposes and may incur additional costs which can be selected at the customers colour appointment. The package price excludes telephone service, customer account opening fees, stamp duty on land, legal fees and conveyancing costs including titles and property report. First Home Buyers Grant already deducted, if not eligible price will change accordingly. Please contact your New Build Co specialist for a full list of inclusions and to organize a detailed agreement. All designs are the property of New Build Co and must not be used, reproduced, copied or varied, wholly or in part without written permission from an authorised New Build Co representative.

INITIALS:

OUR PRE-SITE PROCESS

Our pre-site process outlining everything required before we can start the build.

INITIAL DEPOSIT

Initial deposit of \$2,000 is paid to lock in your home pricing and cover the drafting of your house plans. We will also use this to create your HIA building contract.

DRAFTING

Drafting of your plans including your façade selection will be scheduled and completed by our Architectural draftsman.

COLOUR SELECTION

To make our process streamline, our interior designer has curated interior and exterior colour themes which you can select from. If you would like to select individual colour themes and fixtures we can organize our colour consultant to contact you directly to schedule your colour selection appointment. The colour selection will take up to 3 hours. We recommend you bring some inspiration shots on the day of your appointment.

HIA BUILDING CONTRACT

Once your building contract is complete you will be provided with two full copies for signing along with your drafted plans and supporting documents. Once signed, you will need to provide your lender with a fully signed copy in order for them to apply for unconditional approval of your loan.

UNCONDITIONAL FINANCE APPROVAL

Once unconditional finance approval is received from your lender in writing, you will need to provide us with a copy for our records.

BALANCE OF 5%

At this stage the balance of 5% deposit is payable, minus the initial \$2,000 paid at step 1.

FULL WORKING DRAWINGS

After the 5% deposit is paid, full working drawings will be completed including all elevations and electrical plans. These plans will be the final version which will be used to construct your home so its very important that you check them carefully before final approval.

Note: Design changes after this stage will incur an additional administration fee of \$1000.

SOIL TEST

Once your land is Titled, the soil test and site survey will be completed which will give us all of the information that's required for the foundation design. The BAL (Bushfire Attack Level) rating will also be assessed at this point and will be confirmed in the survey report.

DEVELOPER APPROVAL

Most Developers set their own regulations for home design, siting and colour palates to be used through their estate. This is so they can maintain quality control over their development which will protect your investment. All house plans along with full colour details must be submitted to the developer for approval before we can proceed any further towards obtaining the building permit. Timeframes for this step will fluctuate depending on the developer and the volume of current applications.

ENGINEERING, ENERGY RATING AND WIND RATING

Now that we have the developer approval we can move forward with foundation engineering and obtain the energy rating which will be a minimum of 6 star.

PLUMBING INFORMATION COMPLIANCE

The final step before being able to apply for the building permit is to apply to the relevant water authority to get the conditions of connecting to all the plumbing services for your block (ie: water, sewer & drainage). The standard timeframe for this is 21 days, however, turnaround times can fluctuate depending on the number of applications.

BUILDING PERMIT

Once all of the above steps are completed – all plans and relevant information will be sent to the registered building surveyor to assess and issue the building permit. Once the building permit has been issued, the builder will email you the building permit along with the following documents:

- Stamped approved plans
- Certificate of currency
- Home owner warranty insurance
- Commencement notification letter
- OH&S construction information

Your lender will require all of this information so please forward the entire email to them with attachments.

SITE START

Prior to the building works commencing the builder will complete the production estimating and order materials and supplies. Site files will then be prepared for all relevant trades and handed over to the construction supervisor to begin construction of your new home.

INITIALS:

INITIALS:

EXTERNAL FEATURES

Brickwork - Clay bricks from builder's pre determined colour boards.

Mortar Joints - Natural colour rolled joints.

Front Elevations - As per working drawings. Acrylic render to selected areas as per plan (Product specific).
