DBN HOMES PTY LTD reserves the right to substitute the make, model or type of any of the above products to maintain the quality and product development of its homes. Changes maybe made subject to Res Code or Developer Requirements. Window and sliding door sizes may vary subject to energy rating requirements. If Double Glazing or Low E Glazing is required, extra costs may apply. Electricity / Gas and other utility transfer fee applies. DBN HOMES PTY LTD reserves the right to amend specification and price without notice. All plans and facades are indicative concepts and are not intended to be an actual depiction of the building, fencing, paths, driveway or landscaping are not necessarily to scale. All dimensions are approximate, refer to contract documentation for details. Working drawings take precedence over brochure. Note: Siting for illustration purposes only and may change subject to approval by relevant authorities. Always refer to council approved plans. Any landscaping if included is completed at the landscapers discretion and any landscaping plans supplied may be modified by landscaper as required. Fixed site costs based on developer / client / engineer supplied information. DBN HOMES PTY LTD reserves the right to amend if required.

6 MONTHS DEFECT LIABILITY PERIOD

It is normal in newly completed homes for minor defect items to arise. These minor defect items can be due to building movement, settlement, normal wear and tear, or lack of maintenance.

The first six months after your home is completed is called the Builders Maintenance Period. At the end of the six month period the builder may be required to rectify and/or reinstate any items which may have become defective due to building movement or settling, taking into account any warranty given by manufacturers.

Whilst the legal requirement for the Builders Maintenance Period is to provide cover for three months, DBN Homes will extend this warranty period to six months from settlement.

10 YEAR STRUCTURAL WARRANTY

This warranty will protect your home from structural defects for 10 years after the date of your Practical Completion inspection. It covers the foundation systems, concrete or strip footings, load bearing brick work; structural timbers and steel in wall or roof framing, but does exclude the following defects, namely:

(1) DEFECTS DUE TO YOUR MISUSE OR NEGLECT

Defects caused by neglect or failure on your part to properly maintain your home or by the misuse of your home after the Practical Completion inspection of your home has occurred will not be covered under this warranty.

In addition to other maintenance precautions, you should have regard to the CSIRO's Guide to Foundation Maintenance and Footing Performance on how to care for your new home after completion. Failure to properly maintain the fittings or fixtures on your land including, drains, pipes, pits, plumbing works, electrical wiring and appliances would not be covered by this warranty.

(2) DEFECTS DUE TO ENVIRONMENTAL FACTORS

Defects or damage caused by natural forces or events, including weather, storm, fire, rain, flood, earthquake, and wind are not covered under this warranty. These forces or events can cause damage to roofs, windows, and other parts of the house. You should consider building insurance for your home. In the event of such damage, you should contact your insurance company so that repairs and any rectification work can be put into effect as soon as possible.

(3) NATURAL CAUSES, POOR DRAINAGE & LEAKING PLUMBING

Defects and damage to footing systems or slab due to abnormal conditions (other than seasonal changes), such as the effect of tree roots or plant growth affecting any structural part of the house, poor surface drainage of the land and/or leaking plumbing in or about the house will not be covered under the special warranty. For information about how to prevent that type of defect or damage you can refer to the CSIRO's Guide to Foundation Maintenance and Footing Performance.

(4) MINOR CRACKING

Depending on the prevailing climatic conditions, it will take up to 6 months for your new home to settle into its new environment.

Generally this settlement will become evident as minor cracking to the inflexible internal junctions of walls and the intersection of cornices to both walls and ceilings.

In a new home, movement due to shrinking may evidence itself in minor cracking. For this reason hairline or minor cracks to the inflexible internal junctions of walls and the intersection of cornices to both walls and ceilings and surface crack in slabs and concrete surfaces are not covered by this warranty agreement

(5) TERMITE CONTROL

If required termite control is provided during the construction of your home, in accordance with the Building Code of Australia and Australian Standard AS 3660.1.

Once you take ownership of your new home, it is your responsibility to ensure that your home is inspected and treated each year for termites. Your Termite Protection Guarantee may become void if you do not have a licensed inspector attend your home at twelve month intervals.

Any defect or damage caused by termites occurring in structural timber components of the home will not be covered by this special warranty if these regular annual inspections are not carried out.

(6) SPECIFIC NON STRUCTURAL ITEMS

Without limiting the range of matters excluded under this special structural warranty, any marks or scratches on or defect in any cupboard doors, basins, baths, showers, bench-tops, vanities, carpets and other floor coverings, wall tiles, furniture, fittings, drapes, curtains, blinds, televisions, computer and all electric switches, machines and appliances, painted and finished surfaces, goods and movable chattels are specifically not covered under this special warranty.
